

Jonas Martin

Durham, NC (Open to Relocation) | (919) 539-0004 | jonasmartinit@gmail.com

PROFESSIONAL SUMMARY

Operations professional pivoting into IT support after 10+ years in customer service and university systems administration. Currently completing a B.S. in Information Technology, with hands-on coursework in Active Directory, network configuration, and hardware & software troubleshooting. Known for resolving issues quickly for end users, adapting fast to unfamiliar systems, and keeping accurate records under high-volume, detail-driven conditions.

SKILLS

Operating Systems: Linux (CentOS/Debian/Kali/Ubuntu), macOS, Windows

Programming & Scripting: Bash, CSS, HTML, Java, PHP, Python, R, SQL

Productivity & Tools: Adobe Acrobat, AIM Ticketing System, Google Workspace, Microsoft Office Suite, VirtualBox, Wireshark, XAMPP

PROJECTS

Cross-Platform System & Account Administration (Windows/Linux)

- Provisioned and managed user accounts and group memberships in Windows (Active Directory, PowerShell) and Linux (useradd, usermod, visudo), including privilege escalation to administrator-level access.
- Administered a Linux environment from the command line, file permissions, directory structures, processes, and wrote Bash scripts to automate repetitive tasks.

Network Configuration & Protocol Analysis

- Configured routers and switches in a lab environment, performed IP subnetting calculations, and implemented TCP/IP protocol stacks to establish and verify network connectivity.
- Captured and analyzed live network traffic using Wireshark to identify active protocols, troubleshoot connectivity issues, and validate network behavior through deep packet inspection.

IT Asset Management Database

- Designed and built a SQL database to track newly onboarded employees and their assigned IT assets, including phones, monitors, laptops, and peripherals, with fields covering assignment status, service history, and order/procurement tracking.

Personal Portfolio Website

jonasmartinit.github.io

- Designed, hand-coded and deployed a responsive portfolio site on GitHub Pages using HTML, CSS and JavaScript, including a toggle between a professional layout and a retro game mode.

EDUCATION

North Carolina A&T University

B.S. in Information Technology

Greensboro, NC

Anticipated May 2027 | GPA: 3.83

Durham Technical Community College

Associate in Science

Durham, NC

Relevant Coursework: Computer Networking, Network Security for IT Professionals, Computer Database Management, System Integration & Architecture, Introduction to Unix/Linux, Intro to Computer Programming, Applied Java Programming, Intro to Project Management for IT, Human-Computer Interaction, Web Systems

Honors: Chancellor's List (Fall 2024, Spring 2025, Fall 2025, Spring 2026)

WORK EXPERIENCE

University of North Carolina Chapel Hill

Administrative Support Specialist

Chapel Hill, NC

January 2020 – Present

- Administer the Kronos timekeeping system for approximately 60 employees while implementing payroll adjustments and ensuring data accuracy for zero-error compensation cycles.
- Leverage data analysis and system monitoring to identify and resolve discrepancies in financial records, including processing reconciliations, vouchers, and invoice payments within the university's enterprise system.
- Serve as primary point of contact for a department supporting approximately 8,000 students, delivering multi-channel support by phone, email and in person while resolving software, system, operational and property issues.
- Manage facility compliance and environmental incident tracking by logging & categorizing cases, assigning remediation tasks to maintenance teams, and closing out tickets upon verified resolution: mirroring an IT incident and ticketing workflow.
- Train and support coworkers on the AIM ticketing system, office phone systems and applications, and printers, resolving day-to-day hardware and software issues as they come up.
- Training with the university's Access Control department on building access provisioning using flex pass fob systems, including troubleshooting reader hardware issues and identifying unauthorized access attempts.

Ticon Properties

Leasing Consultant

Durham, NC

February 2016 – December 2019

- Utilized Yardi to manage work requests, maintain structured property data, and track unit availability across approximately 500 housing units spread out over multiple properties.
- Maintained 98 percent and above occupancy by analyzing leasing activity, monitoring trends, and executing timely follow-ups.
- Ensured data accuracy and system updates across tenant lifecycle processes, including application processing, lease management, and payment tracking.
